SCOUTER

ABOUT ME

My name is Cao Minh Nguyet, born in 2000 and currently living in HCM, Vietnam. I spent four years studying at Keimyung University in South Korea, majoring in Global Korean Language and Culture Education. Living and studying abroad provided me with valuable international experience, strengthened my independence, and enhanced my adaptability as well as my cross-cultural communication skills.

SKILLS

- Manual Testing/ Automation Testing/ Jmeter/ Postman/ Selenium/ SQL
- KKorea/ English/ Vietnamese

MY EXPERIENCE

KYUNG IL LIMITED COMPANY

Korean Interpreter

- Interpreted meetings, documents, and daily communications between Korean management and Vietnamese staff.
- Assisted with administrative tasks and supported other company operations.
- Acted as a personal assistant to the Korean Director, handling scheduling and booking necessary products and services.
- Served as a communication bridge between the Director and clients when required.

HCL TECH

Data Labeling / QA

- Carefully labeled and formatted data definitions to train NVIDIA's AI models.
- Ensured output data quality met project standards and requirements.
- Collaborated closely with engineering teams to achieve project goals on schedule.

CLASS101 (Remote)

Talent Scouter

- Used automated tools to identify and collect profiles of content creators on YouTube based on company-defined criteria.
- Scouted and evaluated YouTube channels to ensure alignment with target content, audience, and quality standards.
- Researched and collected hidden or business contact emails associated with selected YouTube channels.
- Initiated outreach by sending collaboration invitation emails to qualified content creators.
- Communicated and negotiated collaboration opportunities with creators via email.
- Maintained accurate records of scouted profiles, outreach status, and responses.

INFINIQ VIETNAM (Remote)

Data Annotator

- Identified and annotated parking space objects for autonomous parking systems.
- Classified parking spaces based on different vehicle types and parking scenarios.
- Applied accurate labels to parking areas following project-specific guidelines and quality standards.
- Reviewed and verified annotations to ensure data consistency and high accuracy.
- Collaborated with project guidelines to support machine learning model training for autonomous parking features.
